

Molecular Biotechnology

Master's Degree Program

Are you passionate about medical and molecular biotechnological research?

You are looking for a position with major responsibilities in vaccine and drug development or in stem cell research. You are curious and determined to find the best solutions to problems.

In human medical-biotechnological development, you want to be at the forefront. You are a team player and are looking to solve challenging problems. You want to work in a multicultural environment with English as the working language.

Your world is medical and pharmaceutical biotechnology

The English-language master's degree program in Molecular Biotechnology is unique in Austria: the emphases of the master's degree program are Molecular Medicine, Human Genetics, Drug Discovery and Immunology. You will learn about the hot topics of big data, personalized data analysis and data security. You will investigate the causes of diseases at the cellular level and learn how to develop new treatments and therapies for them. The degree program is taught at the renowned Vienna BioCenter, one of Europe's hotspots for life science. The degree program is part of a large national and international network at university level.

Biotechnologists - Specialized in Research and Innovation

As a graduate you are mainly involved in medical and pharmaceutical research and development. You also possess the necessary entrepreneurial know-how to ground your own start-up or you may decide to study for a doctorate at an Austrian or an international university.

Overview

4 Semesters
120 ECTS

Master of Science
in Natural Sciences (MSc)

Organisational form
Full-time

40
Study places

FH Campus Wien
1030 Vienna

Language of instruction
English

Tuition fee/semester
€ 363,36¹ + ÖH premium + contribution
¹ maximum € 727 for third-country students

Curriculum

	LECTURE	SCH	ECTS
1st SEMESTER 30 ECTS	Bioethics ILE	1	1
	Bioinformatics ILE	2	2
	Clinical Drug Development ILE	1	1
	General Pathology LE	2	3
	Intercultural Teams in Interdisciplinary Projects ILE	1	1
	Medical Genetics LE	2	2
	Medical Genetics LAB	2	2
	Molecular Genetics LE	1,5	2
	Molecular Immunology LE	2	3
	Molecular Pathology LE	2	3
	RNA LE	1	2
	RNA Analysis LAB	3	3
	Scientific Communication I ILE	2	3
	Vascular Biology LE	1	2
2nd SEMESTER 30 ECTS	Biologicals LE	1	1
	Drug Screening LE	1	1
	Intellectual Property and Patent Law LE	1	1
	In silico Biology ILE	3	3
	Infection Biology LE	2	2
	Innovation in Biotechnology & Start-ups ILE	2	2
	Molecular Pathology LAB	3	3
	Molecular Virology LE	1	2
	Scientific Communication II ILE	2	2
	Signalling Pathways LE	1	2
	Signalling Pathways LAB	3	3
	Stem Cells LE	1,5	2
	Stem Cells LAB	2,5	3
	Electives (1 ECTS of your choice)		
1. RNA SE	1	1	
2. Drug Discovery SE	1	1	
3. Molecular Immunology SE	1	1	
Electives (2 ECTS of your choice)			
1. Therapeutic Strategies LE	1	2	
2. Vaccine Development LE	1	2	

	LECTURE	SCH	ECTS
3rd SEMESTER 30 ECTS	Allergies & Autoimmune Diseases LE	1	2
	Computational Data Analysis ILE	2	2
	Drug Design LE	2	2
	Gene Therapy LE	1	2
	Mass Spectrometry ILE	2	2
	Master Project Seminar ILE	1	1
	Molecular Immunology LAB	3	3
	Molecular Neurobiology LE	2	3
	Molecular Pharmacology ILE	2	3
	Strategic Business Management ILE	2	2
	Toxicology LAB	3	3
	Tumour Biology LE	2	3
	Electives (1 ECTS of your choice)		
	1. Computer-assisted Systems & Data Integrity ILE	1	1
2. Pharmacovigilance & Regulatory Affairs ILE	1	1	
Electives (1 ECTS of your choice)			
1. Scientific Method: Drug Discovery SE	1	1	
2. Scientific Method: Immunology SE	1	1	
4th SEM 30 ECTS	Master Exam		2
	Master Thesis		28

Abbreviations

ECTS	ECTS Credits
ILE	Integrated Lecture
