

# Spatial and Clinical Social Work, Emphasis on Spatial Social Work Master's Degree Program

## Developing Stimulating Offers

You have a work-related interest in complex social problems, such as homelessness, poverty, youth and society and you want to know more about the design of public spaces.

## Acting Between People, Institutions, Society and Space

During your studies, you will broaden and deepen your knowledge of professional action in the Social Space. You will explore concepts and methods of Open Child and Youth Work and learn to design and implement participatory and appropriation processes in community and neighborhood work. Qualitative and quantitative research methods enable you to approach societal challenges empirically.

## Developing and Shaping Socio-Spatial Practice

After graduation, you will be able to develop and implement socio-spatial concepts and projects as well as design Social Spaces. You will work not only with recipients of Social Work, but also in the public with media and actors in administration and politics. In doing so, you will take various interests into consideration and act in inter- and transdisciplinary contexts.

## Overview

**4 Semesters**  
120 ECTS

**Master of Arts in  
Social Sciences (MA)**

**Organizational form**  
**Part-time**

**65 Study places**  
for both emphases

**Campus**  
Kelsenstraße 2  
1030 Vienna
