You Are in Demand!

For years now, FH Campus Wien has been the largest training institution for Social Work in Austria, offering several degree programs that are unique in Austria. Our graduates are in high demand as Social Work experts or managers in organizations in the social sector and Early Education and Care. They continually work to further develop the scope and quality of social services.

All the degree programs are part-time. The bachelor's degree program in Social Work is also offered as a full-time program. Through science-led, action-oriented, activating learning, we prepare you for your professional challenges with a high level of social responsibility. You benefit from our numerous expert partnerships and networks in Austria and abroad as well as from our Competence Center for Social Work, which conducts application-oriented research.

How You Benefit

International

Study abroad, internships abroad, Joint Degree, internships in developing countries, study trips and Internationalisation@Home

Newsletter

Our quarterly newsletter provides information on developments, activities, events, projects and publications at the Department Social Work.

Open Lectures

Visit our cross-departmental open lectures.

Campus Lectures

Participate in free, subject-specific lectures and discussions.

Expert Journals

We publish in the following journals: e.g. soziales_kapital, iFamZ, Klinische Sozialarbeit.

Networks/Experts Committees

We are active in numerous expert committees and networks in Austria and abroad: e.g. OGSA, INUAS, IFSW, IASSW, ECCSW, ÖFEB, EduCare, INAS.

Up-to-Date in Your Field with Our Advanced Training Program

We offer a new training program every semester. Visit our different seminars for professional practice or book special in-house offers for teams and organizations. These programs are organized by the Campus Wien Academy.

Our Cooperation Partners

Active in Research

Research on Childhood,
Youth and Families

Social Policies and
Social Economy

Social Work Research

The Competence Center for Social Work develops and implements application-oriented research projects in these three fields of research. These are highly relevant to current challenges in the social sector. Numerous research projects are realized on behalf of organizations and through research funding programs. They promote the further development of the profession and discipline.

Students earn science awards for excellent theses. You can participate in selected research projects on the following key topics:

- > Urban Transformations
- > Smart Living
- > (Psycho) Social Diagnostics and Concept Development
- > Gender Issues
- > Children, Youth and Family Research
- > Migration
- > Consequences of Discrimination
- > Documentation and Impact Orientation
- > Evaluation
- > Social Reporting Standards
- > Corporate Social Responsibility
- > Diversity in Early Education and Care

Social Work | Bachelor's Degree Program

You are open and interested in the well-being of others.

You respect different concepts of life and want to support others to shape their lives themselves. The degree program is all about recognizing and naming the current needs of people, social inequalities and social contradictions. You are resilient, reflective, well organized and able to recognize your own limits.

Set Your Personal Priorities

You will acquire basic knowledge of the working fields, theoretical concepts and key methods of Social Work for a professional approach to clients, teams, groups and political actors. You will analyze and reflect on social problems in practice, theory and research. You will set your individual priorities in elective modules, elective courses and internships.

Profession Social Work

In the degree program you will acquire a technical understanding in order to best promote human development. For example, you will be mainly concerned with individual crises, social problems and securing livelihoods. Professional fields of Social Work are: health, education and Social Pedagogy as well as work in the Social Space in a mandated context and with the elderly.

Social Management in Early Education and Care | Bachelor's Degree Program

You are a trained kindergarten teacher with professional and management experience.

In your management role, you want to broaden and deepen your expertise, learn about new concepts and theories and critically reflect on your experiences. You want to organize your facility well and give your team the best possible support.

Professionalization Areas

You shape the educational process of children in different elementary education settings. In the area of professional field development and professionalization you will be introduced to scientific methods and their application in the professional field. In the focus on organization and management you will reflect on your role as a manager and deal with, among other things, personnel and conflict management.

Internationally Recognized Academic Degree

Next to your degree, you will expand your professional and expert network. In addition to managing a day care center, as a graduate you will have acquired the skills for the following positions: lecturer at conferences and congresses, teacher in continuing education and training and project manager. You will work professionally and efficiently in the organization of your child care facility and be committed to the education of children.

Children- and Family-Centered Social Work Master's Degree Program

You are interested in working with children, youth and their families.

You want to specialize in this work and learn to support, advise and plan interventions for parents, children and youth in difficult life situations.

Find New Solutions with Families

You will gain extensive knowledge of development, developmental problems, attachment and family relationships. You will train your diagnostic understanding of cases to help you recognize and change complex family dynamics. Your focus is on strengthening parental competencies, improving development opportunities for children and youth and preventing child endangerment. The master's degree program is offered in cooperation with MA 11 - Vienna Child and Youth Service.

Diverse, interdisciplinary responsibilities require qualified professionals!

After completing your studies, you will be able to analyze the complex interplay of individual, familial and social factors involved in the creation and perpetuation of problem situations and family crises. You will be able to develop programs and concepts for outpatient, semi-stationary and inpatient work with families.

Spatial and Clinical Social Work, Emphasis on Spatial Social Work Master's Degree Program

Developing Stimulating Offers

You have a work-related interest in complex social problems, such as homelessness, poverty, youth and society and you want to know more about the design of public spaces.

Acting Between People, Institutions, Society and Space

During your studies, you will broaden and deepen your knowledge of professional action in the Social Space. You will explore concepts and methods of Open Child and Youth Work and learn to design and implement participatory and appropriation processes in community and neighborhood work. Qualitative and quantitative research methods enable you to approach societal challenges empirically.

Developing and Shaping Socio-Spatial Practice

After graduation, you will be able to develop and implement socio-spatial concepts and projects as well as design Social Spaces. You will work not only with recipients of Social Work, but also in the public with media and actors in administration and politics. In doing so, you will take various interests into consideration and act in inter- and transdisciplinary contexts.

Spatial and Clinical Social Work, Emphasis on Clinical Social Work Master's Degree Program

Supporting Marginalized People

You want to promote the psychosocial quality of life of marginalized people, provide health prevention and relational work as well as emotional, informational and instrumental assistance.

Analyze Needs and Provide Treatment

Socio-therapeutic work focuses on consultation and treatment with and from biopsychosocial needs. The focus is on socially induced risk factors such as poverty or social discrimination. Social therapy is a science-based psychosocial practice of Clinical Social Work. One goal is the inclusion of people under extreme pressure in their everyday life.

Acting Professionally for Your Clients

As an expert in socio-therapeutic work, you will advise people in complex life situations and work in multiprofessional, interdisciplinary teams together with professionals in the medical, pedagogical, psychological and psychotherapeutic fields. You will work in non-stationary, stationary and semi-stationary areas and will be able to recognize and process complex interaction or communication dynamics.

Social Economy and Social Work

Master's Degree Program

You are seeking a leadership role in the Social or Nonprofit Sector.

You want to expand your socio-economic and social science expertise and apply your skills in specialist units, departments and projects in the social sector, in the health, education, cultural and sustainability fields or public administration.

European Focus through Joint Degree

You will acquire management skills for the design, planning, control and management of social economy organizations or departments. You will expand your international and transcultural knowledge by dealing with transnational (social) political, legal and economic developments in the European Union. This is supported by international guest lecturers and a two-week study visit to a partner university as part of intercultural project management.

Develop Innovative Solutions for Social Needs

Organizations offering social services are required to guarantee the consultation and care of optimal quality for their target groups despite the government austerity measures. As a manager, you will deal strategically and operationally with finance, personnel development, social planning, quality management, social innovation, change management, social service design, social marketing, evaluation and the impact of social services.
