

UNIVERSITY OF APPLIED SCIENCES

Study International Relations and Urban Policy.

In partnership with

International Relations and Urban Policy

Master's Course

Urban or international?

You are high potential in the public sector or in an international organisation. Global developments and their effects, both large and small, can be easily transferred to your field of activity. You think in broader contexts and look for sustainable solutions, preferably in English. In an international environment, you feel sure-footed, but would still like to develop your management skills.

From diplomacy to governance

Diplomacy, administration, political management and applied political science are your major subjects - unique in this combination as a degree programme. You choose from two areas of specialisation: International Affairs and Urban Policy. Intercultural knowledge has its place as well as digital competences, especially in e-governance and e-diplomacy. You will learn innovative leadership methods and develop your problem-solving skills.

Nationally and internationally applicable

Upon completion of the Master's degree programme, you will be highly qualified to work in public administration at EU, federal, provincial, district and municipal level, in embassies and diplomatic missions, in international organisations both inside and outside Vienna as well as in political or politically related organisations. You are also perfectly prepared to work in an NGO/NPO or in a private company.

Applied Political Science at the FH Campus Wien

The Master's Course International Relations and Urban Policy is part of the Applied Political Science Section in the Department Administration, Economics, Security, Politics. The Applied Political Science Section is a platform for cooperation and exchange between representatives of administration, business and NGOs/NPOs. Through the interaction of academic standards, scientific perspective and close communication with decision-makers, options and alternatives for action are to be identified and scientifically supported. A particular concern of the section is the inclusion of cross-cultural perspectives in the areas of international relations, political management, democracy and human rights, digitalization, and urban policy. The Applied Political Science Section also includes two German-language Master's Courses: Leadership, Politics and Management as well as Digitization, Politics and Communication.

FH Campus Wien University of Applied Sciences

With more than 8,000 students, FH Campus Wien is the largest university of applied sciences in Austria. In the Departments Applied Nursing Science, Applied Life Sciences, Building and Design, Health Sciences, Social Work, Engineering and Administration, Economics, Security, Politics, FH Campus Wien offers more than 60 full-time and part-time degree programs and academic courses. Continuing education in the form of seminars, modules and certificate programs is covered by the Campus Wien Academy.
