Interprofessional & interdisciplinary dialogue - crosslinks to COHEHRE capacity building

Attila Dobos
Semmelweis University
Faculty of Health Sciences
Department of Social Sciences
COHEHRE Vice president
What will follow now

- the problem how we see it
- the problem how YOU see it
- possible solutions we are giving to it
- evaluation(?)
Interdisciplinarity

Since one of the consequences of over-specialization in the epistemological horizon of science, breaking through the classical disciplinary boundaries has become a necessity. However, to establish an interdisciplinary atmosphere one should learn some new skills...
Interprofessional dialogue

Additionally to these new skills there might be political dimensions too e.g. in the competition for funds or conflicts of interests.
What profession do you represent?

- 34%: NOT health profession
- 36%: Health profession
- 21%: More than ONE health professions
- 9%: Health + other professions
What are the problems you experience in interprofessional cooperations?
Our solutions – I.

Having a structure that includes a “transversal” unit – Institute of Basic Health Sciences – provides the opportunity to border-crossings.

Examples: PIC research, Socio-economic status of nurses
Our solutions – II.

Consortium of Institutes of Higher Education in Health and Rehabilitation in Europe

Try to invest in capacity building – e.g. COHEHRE Academy and COHEHRE Research
Upcoming possibilities

- Inspiration, Iteration & Innovation @ Oulu
- Ethics in Community Based Student Projects: Exploring the Possibility of a Win-Win Situation @ Amsterdam
- Culture in healing – Healing in culture @ Budapest
An example from the past

Teaching for the future @ Krakow
